

## Manual

- Command to Start the server
  1. For local workers: `java -jar pa4.jar Scheduler s <<Port Num>> lw <<Num of threads>>`
  2. For remote workers: `java -jar pa4.jar Scheduler s <<Port Num>> rw <<No of threads>>`
- Command to start the client
  - `java -cp pa4.jar Client <<Server Name>> <<Port No>`
- The remote worker commands are run as soon as the instance is started, since the command is in a crontab file which executes the command as the instance starts.
